- 1. Install the iPhone e-Sword LT application from the App Store.
- 2. Download the files from the e-Sword HD & LT page on the <u>www.ctrussell.us</u> website to the computer you will connect the iPhone to for the file transfer.
- 3. Download and install the iFunbox application for your computer (if you do not have this application yet): <u>http://dl.i-funbox.com/</u>
- 4. Connect your iPhone to the computer and then run iFunbox.
- 5. In the iFunbox application click the File Browser tab and navigate to the "User Applications\e-Sword LT\Library\Application Support" folder of the connected device.

- Click the "Copy from PC" button on the iFunbox toolbar. In the Open dialog box that will appear locate and select the e-Sword files you downloaded in step 2. Click the "Open" button to start the transfer process. (See Screen Shot below of the Open dialog box)
- 7. Disconnect the iPhone from the computer.
- 8. Power the iPhone off.
- 9. Power the iPhone on and open the e-Sword LT application. You should see the modules transferred in step 6.
